

REFORMATION COMMUNITY

From North Africa to Nairobi:

1,000 Youth Redefining Climate Action

Discover what's next for climatic peace as we head to Kenya this November.

APPLY TO JOIN US IN
NAIROBI

When you think about where climate action happens, you probably picture policy summits or corporate boardrooms. But at Climatic Peace, we believe the most powerful changes happen when we put climate action and faith communities directly in the same room.

Since December 2023, that shared vision has allowed us to accomplish incredible milestones together with our community

Active programs brought straight into mosques, churches, refugee centers, book fairs, and disaster response fellowships.

This issue is all about our next big room, and we want you to be part of it: **Nairobi, this November.**

The Kenya Project:

RCLS '26Last year, we took the stage in Accra, teaching young African leaders how to turn plans into performance. This November, that stage moves to Nairobi.

In collaboration with the reformation community, we are hosting a summit under the theme: **Implementing the Africa We Want: Youth as Architects of Sustainable Development.**

The Scale: 800–1000 delegates joining us onsite and online.	The Agenda: A full day of panels, masterclass, a youth impact challenge, and hands-on action.	Our Track Record: We arrive battle-tested, from putting 70 young Cairenes through eco-leader training, to equipping 150+ changemakers across the Arab region with exact climate action and disaster risk reduction skillsets.
